

POPPIN' EYE SHADOWS!

1. Stamp your image in VersaMark ink, or use Whisper White Craft ink.
2. Use art brush, sponge daubers to apply the Eye Shadow directly to the ink.
3. Blow off any excess powder.

Tips

- If you're worried about smearing, try setting the chalks with a fixative or an inexpensive aerosol hairspray. Spray at least 12" from project to keep the area from getting too damp.
- Please note that this technique is not recommended for scrapbook pages. As the pH contents are unknown, they may be unsafe for your photos.
